Hi, I'm Francesco Belacca 👋

Senior SRE | Certified Azure Dev, Admin & DevOps Expert

LINKEDIN EMAIL GITHUB 📍 CATTOLICA, EMILIA-ROMAGNA, ITALY

👨‍💻 About Me

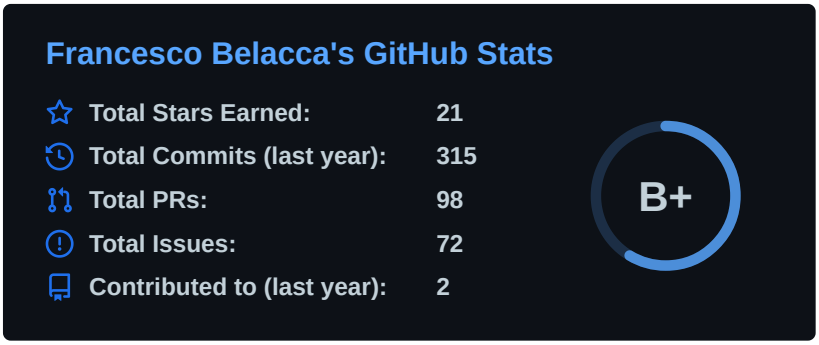

Senior DevOps & Site Reliability Engineer | Azure & .NET Specialist With 10+ years in the tech industry, I help organizations build, secure, and scale their cloud infrastructure. My background spans the full stack—from writing C# backend code to leading development teams and architecting cloud solutions for enterprise clients. Currently, I serve as an SRE at Würth-IT, where I focus on Azure-centric DevOps, governance, and automation across Dynamics 365, Power Platform, and Entra ID services. I thrive in complex environments where operational excellence is critical.

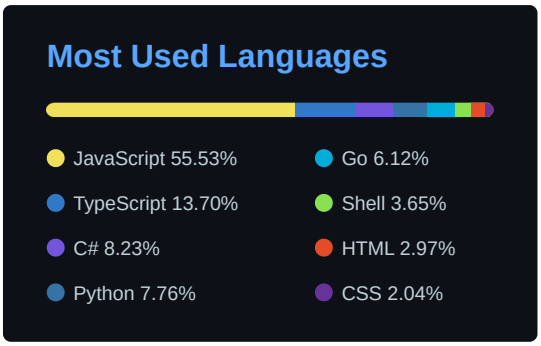

Key Competencies:

- **Governance at Scale:** Navigating compliance and security in a massive single-tenant environment (85,000+ users, 500+ companies). I orchestrate stakeholders to ensure smooth approvals and operations in a complex corporate ecosystem.
- **Infrastructure as Code:** Expert in Bicep and YAML pipelines (GitHub Actions/Azure DevOps) to implement modern, rapid approaches for creating and destroying cloud infrastructure.
- **Backend Engineering:** Strong foundation in .NET and Blazor for building robust internal tools and customer-facing apps.
- **Security Automation:** Managing large-scale secret rotation (Key Vault) and identity security standards.
- **Cloud Solutions Architecting:** Utilizing rapid prototyping to demonstrate value, align stakeholders, and drive management strategies toward modern technical directions.
- **Power Platform Administration:** Managing and governing low-code environments at an enterprise level.

🎯 **My Mission:** To build groundbreaking products that influence billions. I am passionate about simplifying complex distributed systems and applying Domain-Driven Design principles to solve real-world problems.

📊 GitHub Stats

🛠️ Tech Stack

Cloud & Infrastructure: Microsoft Fabric · Business Central · Software Infrastructure · Azure · Microsoft Entra ID · Microsoft Dynamics 365 · Microsoft Power Platform · Cost Optimization · Cloud Security · Windows Azure · Containerization · Distributed Systems · Cloud Infrastructure

Backend & Languages: C# · SQL · OOP · ETL · .NET · JavaScript · LINQ · Database · Server Microsoft SQL · T-SQL · .NET Framework · Microservices

DevOps & CI/CD: Github Enterprise · Powershell Core · Bash · DSC · Automation · DevOps · Version Control · Troubleshooting · Continuous improvement · Git · Windows PowerShell · AZURE DEVOPS

Frontend: HTML · Kibana

Methods & Tools: Stakeholder Management · Public speaking · JIRA · wsl · Communication · Attention to Detail · Analytical Skills · Project management · Agile Methodologies · Agile Project Management · Visual Studio · Microsoft Office · Project Leadership · Generative AI · Search Engine Technology · Artificial Intelligence (AI) · Artificial Intelligence for Business · Chatbots · Microsoft Search

📜 Certifications

AZURE ADMINISTRATOR ASSOCIATE | MICROSOFT CERTIFIED DEVOPS ENGINEER EXPERT | MICROSOFT CERTIFIED AZURE DEVELOPER ASSOCIATE

Other certifications & courses

💼 Experience

Senior Site Reliability Engineer @ Würth IT Italy (Sep 2024 - Present)

📍 Cattolica

- I’ve been the force-multiplier behind Würth-Phoenix’s Microsoft stack.
- Built and maintained complex, dynamic CI/CD in Azure DevOps and GitHub Enterprise for CRM/ERP and Business Central workloads.
- Wrote production PowerShell automation and .NET backend APIs or background services to remove manual toil and harden processes.
- Rolling out Bicep for repeatable, reviewable IaC across environments.
- Lead admin/governance for tenants and repos (Azure, Entra ID, Business Central, Fabric, GitHub Enterprise), enforcing DevSecOps guardrails, RBAC, and compliance by default.
- Partner with developers to shift-left security, codify best practices, and unlock delivery at scale.

Presales Solutions Architect @ Agic Cloud (Jul 2023 - Jul 2024)

📍 Parma, Emilia Romagna, Italia

- Designed Azure landing zones, application architectures, and migration plans for enterprise clients, focusing on scalability, security, and cost control.
- Led technical presales: shaped solutions, produced estimations, and supported bids for complex multi-service Azure projects.
- Drove DevOps adoption using Bicep, GitHub Actions/Azure DevOps YAML, and CI/CD patterns; standardized IaC and deployment practices across teams.
- Engaged with Dynamics teams as an enabler, defining integration patterns, securing workloads with Key Vault/Managed Identity, and improving delivery workflows.
- Collaborated with engineering teams to troubleshoot distributed systems, resolve reliability issues, and streamline cloud operations.

Backend Team Leader & Cloud Developer @ Agic Cloud (Feb 2022 - Jul 2023)

📍 Parma, Emilia-Romagna, Italy

- Continued within AGIC Cloud following the acquisition of Vetrya Cloud by AGIC Technology Group, contributing to the growth of the cloud division as both a senior technical consultant and backend team lead
- Delivered end-to-end cloud-native and full-stack solutions for large enterprise customers, including Enel, in collaboration with Microsoft Consulting Services, covering frontend, backend, databases, and Infrastructure as Code
- Designed and managed multiple multi-region Azure projects from the ground up in fully remote environments, applying best practices for security, automation, scalability, and operational excellence.
- Built proof of concepts and technical demonstrations to showcase Azure capabilities, using modern technologies such as Bicep, Blazor, .NET, Azure DevOps, and GitHub Actions.
- Developed and deployed a custom three-tier containerized application on Azure Kubernetes Service using GitHub Actions, Bicep, Helm, Chaos Mesh, and Azure Load Testing, with Prometheus and Grafana for monitoring and observability
- Performed end-to-end load testing for multiple applications using Azure Load Testing and JMeter.

🚀 Featured Projects

- **macel94** — This profile auto-updates from LinkedIn using the EU DMA Data Portability API, a C# script, and GitHub Actions.

🎓 Education

- **Università degli Studi di Urbino 'Carlo Bo'** - Informatica Applicata(CS) (Sep 2013 - Jun 2020)

  > Bachelor's Degree in Applied Computer Science (L-31), with a strong focus on software development, algorithms, databases, computer networks, operating systems, and software engineering. The programme combined theoretical foundations with practical application, developing skills in programming, system design, and ICT solutions for real-world business and technology contexts.

- **Liceo Scientifico A.Volta Riccione - Corso Sperimentale Brocca** - High School
  > Focus on advanced mathematics and natural sciences within an extended-hours experimental curriculum.

🌐 Languages

- **English** — Full professional proficiency
- **Italian** — Native or bilingual proficiency

🤝 Volunteering

- **Azure Consultant** · education (Dec 2021 - Present)
  > I helped the company with their onboarding on azure for nonprofit helping them obtain 3000$ per year. I helped them choosing the right technology for their use case and building their website, setting up the db, custom domains, etc. https://www.progettosole.org/
